DIEGO CABEZAS

Sculptor

"The Negative space within my work is as important as the positive, like silence between notes in music. It's the balance between the line and the space that makes it special."

Born in A Coruña, Spain, Diego Cabezas studied at the Pablo Picasso art school before opening a studio in Barcelona.

While he has experimented with many artistic mediums, metal is his preferred choice for sculpture. "I love all materials: concrete, wood, ceramic etc., but nothing comes close to iron. It feels like my personal material. It allows me to draw in the air, in 3D, with my hands. Nothing makes me happier."

Diego's sculptures and drawings have most recently been exhibited at the Darwin Gallery in Bordeaux and in collaboration with fashion brand Massimo Dutti. Exhibit A's exhibition in South Kensington marks his first in London.
